

# Mean Time Metrics Calculator

## Instructions

**Step 1:** Click the button below to open the calculator.

**Step 2:** When prompted, click "Make a Copy."

**Step 3:** Pick an asset or group of assets to measure in the tab titled "Asset 1."

***Tip: Need more tabs?***

*Right-click on the "Asset 1" tab at the bottom of the page and click "Duplicate."  
Repeat this to create a tab for each asset or asset group you want metrics for.*

**Step 4:** Entering data into the **yellow cells** only, list all failures associated with that asset or asset group. Reference the "Example" tab as needed for guidance.

**Step 5:** Your Mean Time Metrics will auto-calculate in the **green cells** at the top of the sheet.

***Tip: Finding ways to improve?***

*After making improvements to your processes, create a new calculator to repeat and compare your mean time measurements and see the impact of your efforts!*

Tired of spreadsheets and formulas? We get it.

There is an easier way to generate your MTBFs without adding any other tasks to your day.
